

Statistics for the Online Bookstore project:

Number of registered customers: 25,000,000

Number of books in the database: 1,000,000

Number of new books published per year: 10,000

Number of sessions per day: 500,000

- 70% of the sessions are from registered customers
- 1% of the sessions are from new registered customers
- 29% of the sessions are for “search-only” visitors (i.e., they never register as a new customer).

Number of inquiries to the database per day: 1,000,000 (Note: This number includes not only the inquiries made by the customers, but also the inquiries made by the administrator.)

Number of purchases per day: 300,000

Average number of books bought per session: 2

Average number of book orders that the system generates per day: 10 (Note: these book orders refer to the orders that the administrator has to submit to the book suppliers.)
