CS6290/CS4290 — High-Performance Computer Architecture Spring 2003

CS6290/CS4290
Homework 0

Issued: January 6, 2003
Due: January 10, 2003

Here's a little questionnaire is to help me to figure out who's who and to get calibrated on what you already know. As an example, my answers are on the back.

Name: Photograph

Phonetic pronunciation:
(if unobvious)

Preferred name:
(if different)

(Attach or photocopy-on some photograph that shows your face. For instance, photocopy your student ID onto the page.)

Where did you take the prerequisites (i.e. school & course numbers)?

What other courses are you taking this quarter?

What's your research area or specialization area?

Tell me something interesting about yourself (helps me remember people)...

For instance, here's what I'd put:

Name:

(Dr.) Kenneth M. Mackenzie

Phonetic pronunciation:

(if unobvious)

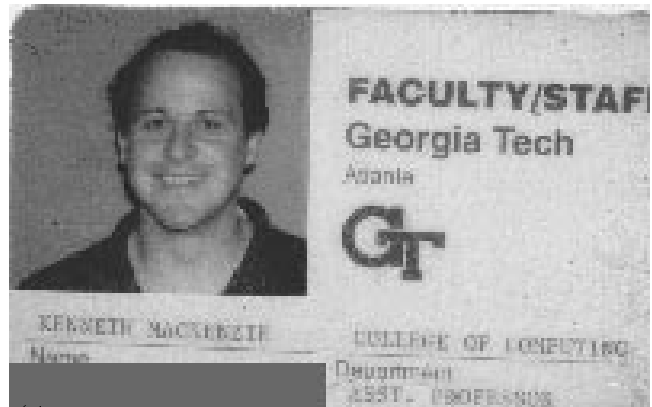

ma-KEN-zee

(but isn't it obvious?)

Preferred name:

(if different)

Ken

(Attach or photocopy-on some photograph that shows your face. For instance, photocopy your student ID onto the page.)

Where did you take the prerequisites (i.e. school & course numbers)?

Lessee ... this will be my sixth time to run CS6290 or it's equivalent.

What other courses are you taking this quarter?

I'm running a section of CS2200 – Computer Systems and Networks.

What's your research area or specialization area?

Computer architecture in the domain of wierd, stripped-down processors, particularly network processors (high performance) and embedded processors (low cost).

Tell me something interesting about yourself (helps me remember people)...

I grew up skiing, backpacking and climbing in the Northwest and learned to play ice hockey in the Northeast. I'm still trying to figure out what to play in the South.
