

Delivery Grading Criteria

- Installation Manual:
 - external software system identifies, download location, version number? installation procedure?
- User Manual:
 - aesthetics? overview over all functionality? main use cases? screen shots?
- Coding:
 - automated tests? big entities like classes or critical methods have comments? readable identifiers? method sizes

- Design Followed:
 - Is the architecture visible in the source code structure?
 - Are the classes from the low level design in the source code?
- Functional Reqs:
 - Are all the functional requirements from SRS in the delivery?
- Non-Functional Reqs:
 - Is the program robust? It must not crash
 - Do they meet their other non-functional requirements?

Test Report

- Filled out test report
- Test case testable, tested commented
- Testing Stop criteria satisfied
- note: if you are missing test cases in the test plan, and haven't added them in the mean time, you will have points off from both test plan and test report.

Demo

- Presentation Style
- Team Intro
- Product Intro, Customer Intro
- Design Info, Process Info
- Status
 - Func
 - Non-Func
- Demo
 - Success
 - Content
