

CS Ph.D. Minor Form

Individual

Name: _____ Student Number: _____
Today's Date: _____

Overview

The minor is a sequence of non-College of Computing courses with a coherent theme. This theme should somehow relate to your thesis and research.

A total of 9 semester hours of letter grade credit must be taken, maintaining a B average in the courses. Exceptions to this should be discussed with the Graduate Coordinator. Courses should be at the graduate level, but one approved 4000-level course may be utilized also. A maximum of 3 hours of guided research course credit is allowed. After Graduate Coordinator approval, please turn in this form to the College of Computing Student Services office. It will then be submitted to the GT Graduate Studies department for final approval. You will be contacted if there are any questions.

Courses

Please list the course number (as listed on your transcript with any descriptive text, if necessary), term taken, and the grade received in the following table.

Course	Term	Hours	Grade
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
