Subject: [cc-undergraduateacademics] Student Alert: New course sections

Dear Students:

Please see the waitlist reminders and the notification below from CoC Administration. We do not have a comprehensive list of the courses, but the sections designations will be "AO".

****

The College of Computing received approval to add online (fully at a distance) sections of some 4000-level courses to the fall 2023 schedule to help accommodate fall 2023 degree candidates on waitlists.

The CoC scheduling team will begin activating these today. Here are some considerations:
- The courses are intended for degree candidates on the waitlists and not for students who want to switch sections.
- The courses will be permit only.
- The scheduling team will review the waitlists and issue permits to degree candidates who cannot fit in the campus sections. Students cannot request permits directly.
- Register for the course within 48 hours of receiving the permit.
- International students- Please be mindful of your enrollment requirements for fully at a distance coursework.

Identifying students and issuing permits is manual, so this will take some time.

****
Waitlist reminders:
- Waitlists carry over from phase I.
- The registrar's office starts the campus-wide waitlist notifications after all time tickets open on Friday (8/18) morning.
- Waitlist notifications will pause on Thursday, August 24th, in the afternoon.
- Waitlists will be removed on Friday, August 25th, in the morning.
- Waitlisting instructions are on the registrar's website.

Sincerely,

Office of Undergraduate Advising
College of Computing
