Subject: [cc-undergraduateacademics] REMINDER: Check and declare threads now

Dear Students,

This is a reminder that CS and CX 3000-4000 level classes will be restricted by threads during phase I registration. See the original message below and declare your threads now.

Sincerely,
****

Undergraduate Academic Advising Office

College of Computing

Subject: [cc-undergraduateacademics] Check and declare threads now

Dear Students,

CS 3000-4000 level classes will be restricted by threads for the entire spring 2024 phase I registration (November 6 - December 15).

Students will only be able to register for these courses if their threads are declared in OSCAR by Thursday, November 2, by noon. NO EXCEPTIONS!!

Take a few moments to check that you entered your threads correctly or to declare your threads.

The last opportunity to declare or change threads before spring 2024 phase I registration is Thursday, November 2. After this date, students can drop a thread but will only be able to add one after thread restrictions are lifted on Monday, December 18, by noon.

Find instructions for adding threads here:
