

Dear Students,

We hope you are all settling into the summer semester, whether taking classes, interning, studying abroad, or taking a break.

The College of Computing undergraduate population continues to grow. To continue to provide you with outstanding academic advising services and programs, we were delighted to add Ms. Brittany Anderson, Mr. Malcom Emerson, and Mr. Christopher Stevens to the undergraduate advising team. This will naturally result in a shift in the advising population for advisors and students.

The new population breakdown below will be effective the week of June 19. Please continue to use Advisor Link (<https://advisor.gatech.edu> or **Via Buzzport**) for appointments and follow your advisor's instructions to access Wednesday drop-in hours. If your new advisor does not yet appear in Advisor Link, refer to their instructions or email them for guidance on making an appointment in the interim.

Note the following exceptions to the advising population shift:

- Ms. Jen Seelman and Ms. Amber Williams will continue to advise accepted BSMS students. There is no shift there.
- Summer and Fall 2023 degree candidates should contact the advisors who completed their degree audits for questions regarding the audit. Contact the new advisor (if applicable) for all other questions or concerns.

Undergraduate Advising Team

- Daurette Joseph Advises CS and CM students seeking readmission as well as students readmitted under academic contract
- Wes Kirkbride advises CM students
- Tim Brown advises students with last name B
