Homework Submission Guidelines
CS 3510-B, Fall 2016

• Submissions and due date
  – Homeworks should be submitted through T-Square.
  – Homeworks are due at the start of class (12:05pm) on the assigned due date (all of which are Fridays).
  – Each student has two ‘late weekends’ where the homework can be submitted before noon of the following Sunday.

• Formatting and typesetting
  – Start the answer to each question on a new page.
  – Please staple together your sheets.
  – Please put your name and GT-ID on the answer sheets.
  – If you choose not to submit a typed write-up, please write neat and legibly.

• Collaboration and use of external sources
  – Collaboration is allowed/encouraged on problems, however each student must independently complete their own write-up, and list all collaborators.
  – No credit will be given to solutions obtained verbatim from the Internet or other sources.

• Presenting solutions
  – Please write succinct and precise answers.
  – Please do not submit programs.
  – Please provide the following parts for any algorithm that you design:
    * idea behind the algorithm,
    * details about the algorithm itself,
    * a correctness argument (need not be formal but should be precise), and
    * an analysis of the run-time.
