Homework Submission Guidelines
CS 3510, Fall 2017

• Submissions and due date
  – Homeworks should be submitted through GradeScope.
  – Homeworks are due at the start of class (3pm) on the assigned due date.
  – Each homework can be submitted up to two days late (still due at 3pm).
  – You have up to four late days across all four homeworks. Using additional late
days (still subject to submitting at most two days after due) will lead to a
deduction of 5 points per late day.

• Formatting and typesetting
  – Your GradeScope account should list the same user id as on T-square: it’s the
one with alphabet + digits, NOT the 9 digit number from student card.
  – Start the answer to each question on a new page.
  – If you choose to not typeset, please write neat and legibly, and either take a
  clear photo, or use a scanner.

• Collaboration and use of external sources
  – Collaboration is allowed/encouraged on problems, however each student must
  independently complete their own write-up, and list all collaborators.
  – No credit will be given to solutions obtained verbatim from the Internet or
  other sources.

• Presenting solutions
  – Please write succinct and precise answers.
  – Please do not submit programs.
  – Please provide the following parts for any algorithm that you design:
    * idea behind the algorithm,
* details about the algorithm itself,
* a correctness argument (need not be formal but should be precise), and
* an analysis of the run-time.
